

17-Practical

Code:

```
Imports System.Console Module  
Module1  
Enum colors yellow = 1  
red = 2  
blue = 3  
End Enum Sub Main()  
WriteLine("Red is color=" & colors.red) Read()  
End Sub End Module
```

Output

When the above code is compiled and executed, it produces the following result:

Red is color=2
